(54) Title: SANITARY NUTRITIOUS DRINK FOR DOGS

(57) Abstract: This application for an Invention Patent refers to a drink for dogs which, in addition to being a food supplement has a sanitary nature which breaks the biologic chain that contributes to the proliferation of various diseases produced by different larvae and particularly yellow fever and Dengue and its transmission vector, the *Aedes aegypti* mosquito. The invention also provides the same substance in powder form and also provides the processes for their preparation.

This International Search Report has been prepared by this International Searching Authority and is transmitted to the applicant according to Article 18. A copy is being transmitted to the International Bureau.

This International Search Report consists of a total of 4 sheets.

☒ It is also accompanied by a copy of each prior art document cited in this report.

1. Basis of the report

a. With regard to the **language**, the international search was carried out on the basis of the international application in the language in which it was filed, unless otherwise indicated under this item.

☐ the international search was carried out on the basis of a translation of the international application furnished to this Authority (Rule 23.1(b)).

b. With regard to any **nucleotide and/or amino acid sequence** disclosed in the international application, the international search was carried out on the basis of the sequence listing :

☐ contained in the international application in written form.

☐ filed together with the international application in computer readable form.

☐ furnished subsequently to this Authority in written form.

☐ furnished subsequently to this Authority in computer readable form.

☐ the statement that the subsequently furnished written sequence listing does not go beyond the disclosure in the international application as filed has been furnished.

☐ the statement that the information recorded in computer readable form is identical to the written sequence listing has been furnished

2. ☐ **Certain claims were found unsearchable** (See Box I).

3. ☐ **Unity of invention is lacking** (see Box II).

4. With regard to the **title**,

☐ the text is approved as submitted by the applicant.

☒ the text has been established by this Authority to read as follows:

SANITARY NUTRITIOUS DRINK FOR DOGS

INTERNATIONALER RECHERCHENBERICHT

5. With regard to the **abstract**,

☒ the text is approved as submitted by the applicant.

☐ the text has been established, according to Rule 38.2(b), by this Authority as it appears in Box III. The applicant may, within one month from the date of mailing of this international search report, submit comments to this Authority.

6. The figure of the **drawings** to be published with the abstract is Figure No.

☐ as suggested by the applicant.

☐ because the applicant failed to suggest a figure.

☐ because this figure better characterizes the invention.

☒ None of the figures.

SANITARY NUTRITIOUS DRINK FOR DOGS

The present invention refers to a drink for dogs which, in addition to being nutritious has a sanitary nature in that it breaks the biologic chain which
5 contributes to the proliferation of various diseases produced by different larvae and particularly yellow fever and dengue and its transmission vector, the mosquito "*Aedes aegypti*".

The particular problem posed is the reproduction of
10 mosquitoes and black flies in domestic animal troughs.

The food components have the purpose of providing pets with substances fundamental for their metabolism and general health.

In addition the drink includes flavoring to ensure
15 its acceptance by dogs, as well as preservers or stabilizers to allow for reasonable periods of stagnation. To the aforesaid sanitary effects, the drink includes a non-toxic larvicide, all of these in adequate proportions and concentrations, using drinking water or a
20 substitute acceptable for veterinary consumption and dechlorinated. In case the water used as solvent includes an excess of one substance or other, for example minerals, the water shall be previously treated.

In case of using drinking or softened water, the
25 elements constituting the drink shall be added to those

presented by the solvent.² All the components of the drink for which protection is sought are detailed hereunder with the respective percentages and concentrations for one liter of solvent, including, in addition to the aforesaid components others the purpose of which in the drink are specified therein.

Vitamins and Minerals

| | | |
|---------------------|-----------------------|-------------|
| Folic Acid | 7.5×10^3 mcg | $\pm 20 \%$ |
| Phosphoric Acid 85% | 10 mg | $\pm 10 \%$ |
| Biotine | 1.5×10^3 mcg | $\pm 20 \%$ |
| Calcium Carbonate | 10 mg | $\pm 10 \%$ |
| Magnesium Carbonate | 20 mg | $\pm 20 \%$ |
| Potassium Chloride | 15 mg | $\pm 10 \%$ |
| Sodium Chloride | 15×10^3 mg | $\pm 20 \%$ |
| Cobalt | 0.25×10^3 mg | $\pm 20 \%$ |
| Copper | 1×10^3 mg | $\pm 20 \%$ |
| Coline | 8×10^3 mg | $\pm 20 \%$ |
| D-Panthenol | 1×10^3 mg | $\pm 20 \%$ |
| Iron | 5×10^3 mg | $\pm 20 \%$ |
| Potassium Iodate | 0.1×10^3 mg | $\pm 20 \%$ |
| Manganese | 0.75×10^3 mg | $\pm 20 \%$ |
| Nicotinamide | 3×10^3 mg | $\pm 20 \%$ |
| Sodium Selenite | 15×10^3 mcg | $\pm 20 \%$ |
| Vitamin A | 0.45 UI | $\pm 10 \%$ |

3

| | | |
|-------------|-----------------------|-------------|
| Vitamin B1 | 2.5×10^3 mg | $\pm 20 \%$ |
| Vitamin B12 | 2.5×10^3 mcg | $\pm 20 \%$ |
| Vitamin B2 | 1.5×10^3 mg | $\pm 20 \%$ |
| Vitamin B6 | 1×10^3 mg | $\pm 20 \%$ |
| Vitamin C | 25 mg | $\pm 10 \%$ |
| Vitamin D3 | 0.1 UI | $\pm 20 \%$ |
| Vitamin E | 2×10^3 mg | $\pm 20 \%$ |
| Vitamin K3 | 4.5×10^3 mg | $\pm 20 \%$ |
| Zinc | 2×10^3 mg | $\pm 20 \%$ |

Preservers for the stabilization of the product

| | |
|-----------------------|----------------|
| Nipagin | 12.5 to 50 mg |
| Nipasol | 12.5 to 50 mg |
| 1,2 Benzisothiazoline | 12.5 to 50 mg |
| Sorbic/Sorbate Buffer | 300 to 750 mg |
| Sodium Benzoate | 250 mg to 1 gr |

- 5 These preservers may be used in combination, with exclusion of some of them, according to the environmental conditions of the place of application.

Amino acids

| | | |
|------------|----------------------|-------------|
| Lisine | 1.5×10^3 mg | $\pm 20 \%$ |
| Methionine | 5×10^3 mg | $\pm 20 \%$ |

Sweeteners

| | |
|--------------------------|---------------|
| Glycerin and/or Sorbitol | 100 to 200 mg |
| Glucose and/or Fructose | 2.25 to 10 gr |

Permitted Coloring Agents

5

Flavoring Agents

Apple, banana, kiwi, cherry, orange, lemon, grapefruit,
cola, pineapple, carrot, vanilla, almond, cacao and cream

Biologic Larvicide

10

| | | |
|---|--------------------------------|--------|
| VETOBAC-AS ® Abbott Laboratories or similar | 7.5 to 15 x 10 ³ cc | ± 15 % |
|---|--------------------------------|--------|

Buffer

| | |
|----------------|-------------|
| Citric/Citrate | Cs 4<pH>6.5 |
|----------------|-------------|

15 Solvent (1 liter)

| |
|-----------------------------------|
| Drinking softened deionized Water |
|-----------------------------------|

The drink may be presented in liquid form for direct consumption or in powder for preparing it by adding the appropriate quantity of water.

5 The preparation of the liquid form consists in estimating the quantity of solvent (water) in accordance with the quantity of drink to be prepared and afterwards adding all the components either directly or previously diluted.

10 To prepare the powder, the component products are mixed and they dried by known methods, for example at low temperature by dehydration or equivalent methods.

Object

As it may be appreciated the canine drink is
15 formulated to supplement especially dry food currently in commerce, therefore the vitamin and mineral levels have been adjusted to avoid overdose when added to the levels existing in dry food.

Small doses of glucose contribute a little but quick
20 source of energy.

The level of sodium chloride has been reduced to the minimum. The formula incorporates a biologic larvicide, non toxic either for humans or animals. This larvicide

6
prevents the reproduction of mosquitoes and black flies
in troughs' water.

Differences with other formulas

This formula is characterized by small doses of
5 minerals and vitamins which, added to those in dry food,
do not cause intolerance in the animal organism.

The preservers doses have been balanced to maintain
the level of *Bacillus thuringiensis* active and stable
supported by microbiological tests, during 90 days, at
10 least.

Problems that are solved

On the other hand, due to the preservers added to
this novel drink, more stability of the formula is
obtained, allowing consumers to maintain it in animal
15 troughs for more time. At the same time, as *Bacillus*
thuringiensis is included, the possibilities for Dengue
and yellow fever to develop are inhibited.

CLAIMS

1. A drink for dogs having nutritious and sanitary nature and comprising in one liter of drinkable dechlorinated and deionized solvent the following
5 components,
-vitamins and minerals, whose expressed quantities can vary in the range of $\pm 20\%$: Folic Acid 7.5×10^3 mcg, Biotine 1.5×10^3 mcg, Magnesium Carbonate 20 mg, Sodium Chloride 15×10^3 mg, Cobalt 0.25×10^3 mg, Copper $1 \times$
10 10^3 mg, Coline 8×10^3 mg, D-Panthenol 1×10^3 , Iron 5×10^3 mg, Potassium Iodate 0.1×10^3 mg, Manganese 0.75×10^3 mg, Nicotinamide 3×10^3 mg, Sodium Selenite 15×10^3 mcg, Vitamin B1 2.5×10^3 mg, Vitamin B12 2.5×10^3 mcg, Vitamin B2 1.5×10^3 mg, Vitamin B6 1×10^3 mg, Vitamin D3
15 0.1 UI, Vitamin E 2×10^3 mg, Vitamin K3 4.5×10^3 mg, Zinc 2×10^3 mg,
-vitamins and minerals, whose expressed quantities can vary in the range of $\pm 10\%$: Phosphoric Acid 85% 10 mg, Calcium Carbonate 10 mg, Potassium Chloride 15mg, Vitamin
20 A 0.45 UI, Vitamin C 25 mg;
-preservers for the stabilization of the product: Nipagin 12.5 to 50 mg, Nipasol 12.5 to 50 mg, 1,2 Benzisothiazoline 12.5 to 50 mg, Sorbic/Sorbate Buffer 300 to 750 mg, Sodium Benzoate 250 mg to 1 gr, in which
25 these preservers may be used in combination, with

- 8
- exclusion of some of them, according to the environmental conditions of the place of application;
- amino acids, whose expressed quantities can vary in the range of $\pm 20\%$: Lisine 1.5×10^3 mg, Methionine 5×10^3 mg;
 - sweeteners: Glycerin and/or Sorbitol 100 to 200 mg, Glucose and/or Fructose 2.25 to 10 gr;
 - permitted Coloring Agents;
 - flavoring Agents: Apple, banana, kiwi, cherry, orange, lemon, grapefruit, cola, pineapple, carrot, vanilla, almond, cacao and cream;
 - biologic larvicide, whose expressed quantity can varies in the range of $\pm 10\%$: VETOBAC-AS® Abbott Laboratories or similar 7.5 to 15×10^3 cc; and
 - buffer: Citric/Citrate Cs $4 < \text{pH} < 6.5$.

2. A drink according to claim 1, wherein the solvent is drinking water or a similar substitute acceptable for veterinary consumption and previously dechlorinated.

3. A drink according to the claim 1 or 2, wherein if the water used as solvent includes some substance in excess, like some mineral or other, the water is previously treated.

4. A powder preparation comprising all the components according to claim 1 excepting the solvent.

9

5. A process for the preparation of a drink according to claims 1 to 3, wherein the quantity of solvent is estimated in accordance with the quantity of drink to be prepared and then adding to said quantity of solvent all the components either directly or previously and partially diluted.

6. A process for the preparation the product referred to in claims 1 to 4 to be provided in powder form wherein the component products are mixed and the mixture is then dried by known methods, for example at low temperature by dehydration or equivalent methods.

7. A product for dog consumption according to any of the preceding claims which can be provided in liquid form bottled in disposable or non disposable containers or in powder form packed in dry containers.
